

Service & Maintenance Tools and Tool Kit

New Service and Maintenance Tools and complete Tool Kit are available now!!!

These Hand Tools are ideal for low volume production, prototyping and repair and can help to keep initial investment costs to a minimum.

The hand tools are able to crimp a broad spectrum of contacts with wire sizes from 28 to 8 AWG making them most suitable to the service industry.

Attractively packaged the Tool Kit is equipped with one base Hand Tool and four interchangeable diesets.

The diesets are compatible with the following contacts and ferrules:

- PIDG & PLASTI-GRIP
- FASTON
- SOLISTRAND
- Wire End Ferrules

An integrated, releasable ratchet mechanism ensures a complete crimp cycle which leads to high quality crimp connections.
