

Introduction

Product Facts

- Provides abrasion protection for wires, cables, tubing, and hoses
- Attractive – makes neat, compact uniform bundles
- Break-out at any point along the bundle
- Moisture resistant – will not hold "cable-rotting" moisture
- Meets military and commercial specifications
- Quickly applied by hand

SPIRAP plastic wrap is a very practical way to bundle and harness cable, wire, tubing and hoses.

Economical and quickly applied, it provides continuous abrasion protection – even under severe vibration.

SPIRAP plastic wrap is pre-wound in continuous lengths. The diameter of the SPIRAP plastic wrap is slightly smaller than the bundle diameter it is recommended to protect.

When applied, the plastic coil self-contracts to contain those items being bundled. This produces a tight, uniform protective jacket.

SPIRAP Spiral Band

SPIRAP Spiral Band

- Made in Polyethylene for maximum strength and insulation
- Available in Natural and Black
- Supplied in 10 meter packs
- Bundle Range from 15.0 mm to 100.0 mm

Available in Bundle Range from 15.0 mm to 100.0 mm

Size (mm)	Color	Inner Diameter (mm)	Bundle Diameter Range (mm)	Band Width (mm)	Part Number	Package Quantity (m)
15.0-18.0	Natural	1.5	15.0-18.0	4.0	1478699-1	10
4.0-50.0	Natural	4.1	4.0-50.0	7.0	1478699-2	10
7.5-60.0	Natural	10.0	7.5-60.0	11.4	1478699-3	10
